

Innovations in Architecture, Playful Learning, Education and Services for the
Future School

InnoArch

Places and Spaces for Learning

Helsinki University of Technology

Department of Architecture

Laboratory of Urban Planning and
Design

InnoArch Research Goals

Primary Goal

to deepen the understanding of
the interrelationship between a
spatial experience and a
meaningful learning process
(TSL)

Secondary Goal

to develop a collaborative,
inquiry based planning and
design process for the future
school

InnoArch Contribution

New environmental design principles, concepts and models, which

- support inquiry based learning and pupils' epistemic agency by means of architecture as well urban planning and design,
- exploit interactive technological applications in the architecture and construction of physical and virtual places for learning,
- strengthen the role of school as a central actor in a learning community and,
- promote shared understanding of our urban space.

Formal learning
Informal learning

InnoArch Research Matrix

<div> <div>Process</div> <div>Spatial Dimensions</div> </div>	Inquiry Based Learning (TSL)	Inquiry Based Planning & Design
School Building (Local)	How do different pedagogical processes take place in school buildings? What is the meaning of space experience in learning?	How to plan and design the future school and a learning neighbourhood as a participative process?
Neighbourhood (Urban)	How can the neighbourhood environment serve as a cross-curricular theme?	
World (Global)	How to promote cultural understanding between children around the world in different urban environments?	
Virtual	How can technology (GIS, mobile positioning, neighbourhood websites) serve as a mediating element between the school and the neighbourhood and the world wide network of children in different neighbourhoods?	How to integrate technology into the architecture and construction of places for meaningful learning?

InnoArch Architectural Concepts

Place & Mapping

Place-based approach to pedagogical processes: mapping or taking place

The definition of place:
Locale, Position, Functions and Intensity

Space & Experience

Architectural/spatial analysis of the building and of the neighbourhood

Space experience on each environmental scale goes with all senses

InnoSchool

Helsinki University of Technology

University of Helsinki

University of Lapland

Stanford University

University of California, Santa Barbara (UCSB)

InnoArch Indoor Studies

Focus on the school building itself and its immediate sphere of influence in different learning situations:

- **School as a spatial experience:
mapping and monitoring the
use of Arabia School
together with InnoEdu**
- **24 usability in Arabia School**
- **Comparative study in Stanford 'Loft',
Center for Design Research (CDR)**

InnoArch Outdoor Studies

**Neighbourhood level
environmental study
by using mobile phone, GPS logger,
Brieftec Binder soft ware and
Google Earth maps**

InnoArch Outdoor Studies

Asking children about their
perceptions, experiences
and moving
in the neighbourhood

1. Mind mapping

2. Mobile mapping

3. Interview

InnoArch Global Studies

Mapping the cultural landscapes of learning

Utilizing the
Lappset SmartUs network
Helsinki
Rovaniemi
Stockholm
Enköping
Petersborough
Santa Barbara
Torino

...

Vision:

Website for children's environmental agency; bringing together children's perceptions and experiences in their daily environment

InnoSchool

Helsinki University of Technology

University of Helsinki

University of Lapland

Stanford University

University of California, Santa Barbara (UCSB)

InnoArch Global Studies

www.smartus.com

Twofold goal:

To strengthen the epistemic agency of school children in their daily environment
To get comparative qualitative data from culturally different environments

InnoArch benefits

Municipalities

City of Espoo; City of Helsinki; City of Rovaniemi

- piloting the idea of “a learning neighborhood”
(mapping the formal and informal elements of learning in a neighborhood level and visualizing the learning network)
- developing the collaboration between architectural and pedagogical expertise in planning and designing learning environments
(building level, urban level)
- developing school networks (Village School Network)

InnoSchool

Helsinki University of Technology

University of Helsinki

University of Lapland

Stanford University

University of California, Santa Barbara (UCSB)

InnoArch benefits

Industrial partners

Microsoft, Elisa, Lappset Group Ltd., Martela, Cramo Instant

- producing new spatial and architectural concepts for school buildings (design concepts, modularity, flexibility, integrated smart technology, furniture, etc.)
- testing mobile technology and positioning software in connection with learning processes
- reflecting the research results to the existing future school concepts

InnoSchool

Helsinki University of Technology

University of Helsinki

University of Lapland

Stanford University

University of California, Santa Barbara (UCSB)

InnoArch benefits

Dissemination partners

National Board of Education; Finnish Forest Industries Federation

- developing new spatial concepts for inquiry based learning
- studying local environment as a cross-curricular theme
- evaluating the new building design standards for future schools (RT Building Information File)
- promoting the use of wood in the architecture of learning
